

KALE FANS AIRMOVE

AIRMOVE is powerful, yet lightweight and flexible enough for one person to operate, and is impervious to rain, moisture, and inclement weather. Its 6.5 ft (2-meter) size provides ultimate portability, whether it's a narrow aisle, a crowded auto shop, or a fitness center. Whether you need indoor or outdoor ventilation, you can use AIRMOVE to improve ventilation and cooling on a factory floor, in a commercial setting, or a confined space.

KEY FEATURES

▶ Move Freely

Designed with 4 casters, it can be moved freely to any place where wind is needed indoors or outdoors.

▶ Large air volume

Ultra-long air supply distance, the effective distance of wind speed exceeds 36m, which can cover most of the length of the basketball court.

▶ Energy Saving

The total power of the fan is 0.55kW, the energy consumption is very low, and the energy consumption cost for a whole day of operation is only a few dollars.

▶ Stepless speed regulation

PMSM permanent magnet synchronous motor drives the fan blades, stepless frequency conversion speed regulation, the fan can be controlled freely, the operation is simple and convenient.

▶ Water and dustproof

Overall waterproof performance, the fan can be operated normally in rainy and humid environment; it is easy to clean and while cleaning, do not need to disassemble the frame and directly rinse with water tap

DIAMETER

6.5FT (2.0 METERS)

FRAME

STEEL MESH COVER

VOLTAGE

220V/1P
110V/1P(OPTIONAL)

WARRANTY

WHOLE SET FAN
WITH 3 YEARS
